THE LONGSHOT FILES — WEEK ONE

Ten cases to print and solve with a pen

NOVEMBER 2026 · WEEK 1 EDITION

Two cases at each of the five detective ranks. Every case has exactly one answer, reachable by deduction alone. Solutions are at the back.

A NEW CASE EVERY DAY · SCAN TO PLAY

WELCOME, DETECTIVE

You have been handed ten open files. Nobody else is coming. That is not a slight — it is the job, and the reason you were sent for.

Each file is a closed room in the old sense: a victim, a small number of people who could have done it, a small number of places it could have happened, and a small number of things it could have been done with. Beside each one you will find a grid. That grid is the whole of your equipment.

A word on method, because detectives who rush these lose days to them. You are not looking for the answer. You are looking for what *cannot* be true. Cross off the impossible, patiently, one clue at a time, and the guilty party is simply whoever is left standing when there is nowhere else to put them. Every case in this pack has been checked — twice — so that this always works. You will never need to guess, and if you find yourself guessing, you have missed something you already have.

The files are arranged easiest first. The early ones will go quickly. By the last two you will be working a larger board and keeping track of when each suspect arrived as well as where they went, and the clues will stop being helpful one at a time and start being helpful only in pairs. This is deliberate. It is also, in the view of this office, the good part.

Answers are at the back. There is no scoring, no clock, and nobody is counting. Use a pencil if you would rather not commit.

Good hunting.

Solutions to all 10 cases are at the back.

1 · READ THE FILE FIRST

Every case opens with the suspects, the rooms and the weapons in play, then the clues. Read all of it before you mark anything. Roughly a third of the clues will only make sense once you know what else is on the board.

2 · THE GRID IS FOR ELIMINATING, NOT FOR GUESSING

Each square is one question: could this suspect go with this room, or this weapon? Put ✗ in a square the clues rule out, and ✓ in one they confirm. Most of your marks will be crosses. That is normal — a case is solved by removing possibilities, not by spotting the answer.

3 · ONE TICK CLEARS A ROW AND A COLUMN

The moment you write a ✓, everything else in that row and that column becomes impossible: a suspect was in one room, and each room held one suspect. Cross the rest out immediately. Skipping this is the single most common reason a solvable case feels stuck.

4 · CARRY FACTS ACROSS THE GRIDS

The grids are joined. If the weapon was found in one room, and you have already placed a suspect in that room, then the weapon is that suspect's — even though no clue says so. Work the chain each time you place a tick.

5 · WATCH FOR WHAT IS NOT SAID

At the higher ranks some statements are witness testimony, and a witness may be mistaken or lying. A clue phrased as an alibi is still evidence about somebody. Later cases also add a fourth column — the time each suspect arrived — which behaves exactly like the others.

6 · NAME ALL THREE

A solved case is a person, a room and a weapon together. If two of the three are certain and the last is not, the grid still holds the answer. Go back to the clue you read past.

PRINTING & SHARING

Print this pack as often as you like, for a classroom, a puzzle group, a care home or a long flight. Photocopy it, hand it out, leave it in a waiting room. Please link to deduce.studio/printables rather than re-hosting the file, so people find the current pack. © 2026 Deduce Studio. Cases are fiction; any resemblance to real persons or events is coincidental.
